Which of the three domains (Emergency Triage, Chopsticks hand game, Highway driving) was hardest?

Which, if any, logical connectives were hard? ("all of", "both of", "one or more of", "neither of", "none of")?

What do you think when you see a logical form like the following:

I add my right hand to my opponent's left hand when
- One or both of:
    - Both of:
        - my left hand is not out
        - my right hand is out
    - All of:
        - my left hand outs my opponent's left hand
        - my right hand does not out my opponent's left hand
        - my left hand outs my opponent's right hand

What do you think when you see a logical form like the following:

I triage as immediate when
- None of:
    - Not both of:
        - patient is able to breathe after opening airway
        - patient is breathing
    - One or more of:
        - capillary refill takes less than 2 seconds
        - patient is breathing
        - respiratory rate is between 10 and 30
    - One or more of:
        - pulse is between 40 and 70
        - respiratory rate is between 10 and 30
        - patient is breathing

What do you think when you see a logical form like the following:

I merge right when
- All of:
  - a vehicle is not to my right
  - One or both of:
    - a vehicle is to my left
    - the next exit is 42
  - One or both of:
    - a vehicle is in front of me
    - the next exit is 42

What do you think when you see a logical form like the following:

I triage as urgent when
- One or both of:
  - Both of:
    - patient is not breathing
    - patient is able to breathe after opening airway
  - Both of:
    - patient is breathing
    - One or both of:
      - respiratory rate is not between 10 and 30
      - All of:
        - capillary refill does not take less than 2 seconds
        - respiratory rate is between 10 and 30
        - pulse is not between 40 and 70
